## Meter reading or power outage

To take a *meter reading*, press + or – and note the first number displayed

To turn on the electricity, turn the knob from position O to position 1 or press the black button.

In the event of a cut, check that the main circuit breaker is on 0, if this is not the case, lower it and leave it for 3 seconds before raising it.

## **HEATERS**

If you have a problem with your heater, check that it is on before calling the technicians.

It is possible that it was switched off when the former tenant left.

To do this, simply press the button to put it on button 1.

If, despite this, the problem persists, you can send a maintenance ticket to the technicians in order to obtain an intervention (do not forget to write, when writing the ticket, your name and your accommodation number).

## **Light Bulbs**

We remind you that the replacement of light bulbs in the apartments is the responsibility of the residents.

#### **Procedure:**

- Switch off the meter at the electrical panel
- Remove the bulb to be changed
- Restart the counter
- Take the used bulb with you and choose the same model, if necessary, present it to the store clerk, to be sure to buy the appropriate model.
- Replace the bulb <u>after switching off</u> the meter at the electrical panel.

If you do not know how to put it back in place, <u>a</u> <u>technician can come</u> and do it for you.

In this case, you will make a request to install a bulb via a maintenance ticket, making sure to leave the new bulb available to the technician in your home.

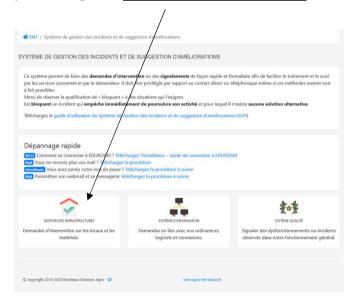

## Intervention request (ticket)

To <u>be able to make tickets</u> to our technical team, you must **connect to your ENT** with your generic agro address.

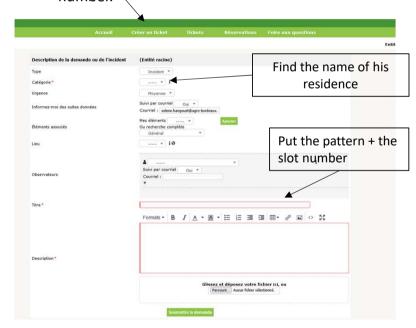

Following this, you must click on "Help and assistance - GLPI"

Once done, you will arrive on the page below, you must go to "Infrastructure management".

Click on create a ticket and write it, remembering to enter your accommodation number. \

Do not forget the polite formulas ©

## Intercom

Tip for entering the residence when the front door is closed

- Tape here is also the access code 0809.
- Or scan you student card here

# Fire safety

We remind you that it is strictly FORBIDDEN to handle fire extinguishers or to press the red manual trigger except in an emergency.

In the event of a fire, press the red manual trigger closest to you to warn the entire campus and your classmates. (In case of misuse, a sanction will be applied).

For your safety, please do not leave anything lying around in the common areas in order to clear access to corridors, doors and stairs.

## GOING AWAY FOR A FEW DAYS?

Do not forget, when you leave for several days, to turn off your HEATER.

Remember to clean your accommodation thoroughly (dishes, trash, etc.) to avoid any risk of pests during your absence.

## Cleaning checklist in preparation for inventory

#### The accommodation must be returned empty and clean.

#### Kitchenette:

Cleaning

- Electric plates/sink + stainless steel plan and wall tiles
- Defrost your fridge at least 24 hours in advance so that when you leave, there is no water left that could flood the accommodation.
- Ventilation grid (VMC)

The cleaning of the fridge must be scrupulous (pull it out to clean the floor under it, take out the lower shelves and clean the door seals).

#### Main piece:

Cleaning

- Indoor and outdoor cupboards
- Windows (interior and exterior panes).
- Interior shutters
- Interior and exterior desk and drawers
- Wash the mattress cover at 60° in the machine and reinstall on your departure.

#### Bathroom:

Cleaning

- > Indoor and outdoor sanitary facilities (bowl + lid above/below + WC plinth)
- From the shower (tray + wall tiles + curtain)
- > Shower curtain: wash it at 30° in the machine and reinstall it before you leave. If too dirty, please install a new one.
- Washbasin and washbasin support + taps + sink stopper.

#### Miscellaneous:

Cleaning

- > Baseboards, switches, electrical outlets and pipes (dust and wash)
- > Walls and ceiling: splashes and cobwebs will be removed
- The floor will be vacuumed and washed with a real floor cleaning product.

If the cleaning is not satisfactory, it may be charged.

# Recommendation for household products

Cleaner and descaler for your toilets.

Kitchen cleaner and degreaser

Window cleaner

Floor and surface disinfectant.

Scouring cream to descale and degrease

Non-scratch metallic sponge

**CAUTION** if you use white vinegar remember to rinse very well!

# **Unclogging Shower Drain**

Turn the siphon grid to  $\frac{3}{4}$ .

Then pull to retrieve it.

Once done, remove the siphon so that you can remove any hair or other that is blocking the proper flow of water

Replace the siphon.
